Objective: we are doing a project in our course language and society. Our topic is observing different news sources and the differences in how they deliver news, based on their ideology, support/critique of government etc.

Creators:

1. Sarthak goswami
2. Dhruv rathee
3. Mohak mangal
4. Aaj tak
5. Republic tv
6. The wire

Events:

1. Ram Mandir donation controversy
2. Students' protest regarding NEET paper leak

Methodology: We have taken 2 events. We shall analyse exactly 1 video of each channel covering each event. We shall fill the analysis form for each creator. (analysis form is attached).
The analysis form contains:

1. overall guidelines on what all to observe
2. event1 and event2 which are event specific i.e need to be filled for each video individually
3. common form blankexcerpt which we shall copy as many times a we like, whenever we find a very interesting para worth analysing
4. Common form event summary which needs to be filled for both events

We shall store the transcript for the videos (freely available on youtube) in a separate google drive. It is important that along with observations you also store the timestamps of where you made that observation. We shall normalize data later, you dont need to worry about that. Don't use ai dubbing. Certain videos have topics other than the one being analysed as well, ignore the irrelevant parts.
